Chapter 1 Some Hot Tips to Get You Started 1

Setting Up the Visual Basic Design Environment 1
Deleting Multiple Items in a ComboBox and ListBox 6
Adding Cut, Copy, Paste, and Undo Features Quickly 6
Moving Files without All the Work 7

Chapter 2 Tips on Working with Strings and Arrays 9

Returning an Array of Fixed Length Strings 9
Avoiding "Array Locked" Errors 10
New Visual Basic 6 String/Array Features 11

Chapter 3 Tips on Working with Controls 17

Using the Validate Event instead of LostFocus 17
Verifying that TextBox Entries Are All Nonempty 17
Automatic Selection of Text 19
Keeping Text Highlighted When the Focus Moves Away from a Control 20
Ignoring Keyboard Characters in a TextBox Control 20
Using a TextBox Control to Get the Effect of a Scrolling Form 20
Turning Off Word Wrap in a RichTextBox Control 21
Adding the Default Context Menu to a RichTextBox 21

Using a RichTextBox to Add a Quick Save/Load File Capability 22
Toggling ListView Sorting Order Like You Can with Explorer 22
Removing Selected Items from a ListView Control 23
Getting the Number of Items Selected in a ListView Control 25
Grid Printing Made Easy 26
Clicking an Object Using the Windows API 31
Viewing an Oversized Picture Using Scroll Bars 32
Extending the Timer Control to Intervals
beyond the 65.5-Second Range 35
Using the SysInfo Control to Determine When
the Hardware Environment Changes 35
Using Windowless Controls to Make Properties
Read/Write at Runtime 36
Taking Advantage of Adding Controls Dynamically at Runtime 36

Chapter 4 Disk and File Tips and Tricks 39

Getting a File Name from a Path (Before Visual Basic 6) 39
Getting a File Name from a Path (After Visual Basic 6) 40
Creating a Full Directory Path 41
An Optional Way to Create a Full Directory Path 42
Finding a File in Drives or Folders 43
Copying Files by Using Version Checking 45
Copying Files with a Progress Indicator 49
Finding the Path of a Loaded File 52
Finding the Total Space Available on a Drive 53
The New File System Objects 55
Retrieving Drive Information using File System Objects 56
Using the Scripting Engine to Work
Recursively on the Directory Structure 57

Chapter 5 Tips and Tricks to Use with Forms 61

Adding a Form to the Add Form Dialog Box 61
Making a Form Elastic 61
Making a Form Stay on Top of All Other Windows 64
Adding Items to a ControlBox Menu 65
Tileing a Bitmap across a Form 69
Displaying Forms within a Form 73
Bringing MDI Forms to the Top 74
Making MDI Child Forms Act Modally 76

Automating an Options Dialog Form 77
Creating Non-Rectangular Forms 79

Chapter 6 Tips from the World of Windows API 81

Detecting a Sound Card or Speaker Driver 81
Launching Programs or Files from Your Application 82
Rolling Your Own GUIDs 87
Verifying a User's Log-in Password 89
Getting the Current User's Name 90
Getting a Machine Name 91
Opening or Closing the CD-ROM Door 92
Getting a List Separator Based on Geographic Locale 93
Creating Improved DoEvents for NT Users 94
Adding Pop-Up Help to Your Program 95
Adding Quick Search to ListBoxes and ComboBoxes 97

Chapter 7 Tips on Visual Basic and the Internet 99

Using the WebBrowser Control to Build a Customized Browser 99
Using the Application Wizard to Build Your Special-Purpose Browser 100
Watching for Backslashes in Web Addresses 102
Printing HTML Documents with the WebBrowser Control 102
Using the Internet Transfer Control to Smart Mine the Web 103
Using the Internet Transfer Control to Get Stock Prices (And Other Kinds of Data Mining) 104
Avoiding the OpenURL Method for Time-Consuming Data Transfers 107
Accessing IIS Objects from a Visual Basic ActiveX DLL 108
Determining whether RAS Is Connected 111

Chapter 8 Database Tips for Visual Basic and Microsoft Access 113

Getting Up to Speed on Access Versions 113
Three Secret Techniques to Document Your Code in Microsoft Access 114
Unloading Your Database Workspace 115
Dealing with Enter Keystrokes When Exporting Databases to Text Files . . . 116
Avoiding SQL Query Problems from Erroneous Single Quotes 117
Dealing with Null Database Fields 119
Filling a ComboBox with Data Quickly and Easily 120

Adding Security to Access Database Diagrams 121
Opening a Secured Access (Jet) Database with ADO 122
Determining Which Version of the Microsoft Data Access Component You're Running 123
Using the New Commands that Bring Access Closer to ANSI SQL 124
Working with ActiveX Data Objects 124
Investing in Microsoft Office Developer 127
Getting a Handle on Data Source Names 128
Becoming Familiar with Access 2000 Data Access Pages 129
Enabling Row-Level Locking 130
Creating Crosstab Queries. 130
Emulating Access Forms in Visual Basic 130
Giving the Right Password 131
Finding Important New Information on Integrating Access and SQL Server 131
Discovering Resources for Migrating from Access to SQL Server 131

*Chapter 9 Tips and Tricks on Some Advanced Stuff *133

An Introduction to the AddressOf Operator 133
Detecting whether Your Program Is Running in the Integrated Development Environment 138
Using the SHFormatDrive Function to Format Drives 140
Visual Basic Runtime Files 142
ActiveX Components and Long File Names 144
Registering and Unregistering COM Objects Easily 145

*Chapter 10 Miscellaneous but Nevertheless Super-Useful Tips *147

Changing the MousePointer with Class 147
Converting Hours to Minutes 149
Displaying 3D Text without a Control 150
Fixing the "License Information for This Component Not Found" Error . . . 152
Disabling Dr. Watson on Windows NT 153
Running Programs at Startup 154
Discovering the COMCTL32.OCX, COMCT232.OCX, MSChart.OCX Controls Upgrades 155
Getting the Screen Resolution 155
Determining Who's Logged onto the Computer 156

Invoking the Windows Shortcut Wizard 157
Fixing the "Could not be Loaded" Error 158
Fixing the "Can't find project or library" Compile Error 159
Restoring the Visual Basic IDE Back to Its Original State 160

Appendix A Touring the VB Tips & Tricks Web Site 163

VB Tips & Tricks Newsletter 163
Programming Tips 163
Advanced Programming Techniques 164
Software Development 164
Component Products and Reviews 164
VB Dave's Corner 164
VB Tips & Tricks Report Cards 165
Free Software Contest, Downloads, and More 167

Appendix B Visual Basic Information Resources 169

Web Sites 169
Publications 171
User Groups 172
Newsgroups 172
Visual Basic Insiders Technical Summit 173
Microsoft Developers Network 174

Appendix C The APIGID32.DLL Library 175

Numeric Functions 175
Pointer and Buffer Routines 176
FileTime Functions 178
Miscellaneous 179
